

# LEVEL GLOVES MAINTENANCE AND CARE

How to preserve and maintain your winter gloves life following ours easy steps:

## 1. WASHING AND DRYING

- 1.1\_ never use machine washing.
- 1.2\_ wash them with a mild soap and lukewarm water.
- 1.3\_ (leather gloves only) use a wet cloth and fat detergent to remove stain.
- 1.4\_ don't use aggressive solvents.
- 1.5\_ no softener should be used in order to prevent any functional damage.
- 1.6\_ remove liners (while possible) when washing your gloves and wash it separately.
- 1.7\_ if your gloves do not have removable liners, do not turn inside out. the liner, insulation and membrane can be very difficult to put back into place.
- 1.8\_ squeeze out all excess water from the fingers toward the cuff and pull gently into shape.
- 1.9\_ gloves dry better in upright position.
- 1.10\_ do not use radiators or other sources of direct heat. this could cause cuts and other damages.
- 1.11\_ let the gloves drying by nature. when possible not over direct sun.
- 1.12\_ you always find additionally instructions inside of your gloves.

## 2\_ LEATHER TREATMENT

We do not recommend washing leather gloves frequently

- 2.1\_ use a wet cloth and fat detergent to remove stain.
- 2.2\_ squeeze out the water gently without twisting.
- 2.2\_ after drying, use a classic leather balm to enhance the durability of the leather and maintain its smoothness.
- 2.3\_ in the course of time, the leather could slightly change the outer appearance. nothing change the performance and durability.

## 3\_ STORAGE

- 3.1\_ store gloves only when dry. Dark and cool places are favorite
- 3.2\_ if possible, keep out gloves from direct sun light (UV-radiations) in order to prevent slight outer discoloration.
