ASYMMETRICAL DESIGN
 Two different motifs are digitally printed on both shells for a trendy-inspired glove.

WIND BREAKER LINING
 A thin fabric lining designed to resist wind chill and light rain. It is of lightweight construction and made of a synthetic material.

ADJUSTABLE STRAP
 This closing system makes it easy to fit under jackets therefore offering a better closure.

LEATHER OR SILICONE PALM
 Two different solutions. The silicone printed palm offers great grips and top performance while the leather one provides improved sensitivity and higher insulation.
