HIGHLIGHTS: Special gate protection, Kirax Stimulator System **FEATURES:** Sublimation on back, Silicone grip, Dyneema stitching, Superfabric, Custom Fit, Tubes 3D protection technology, Graphene lining, Finger lining inside

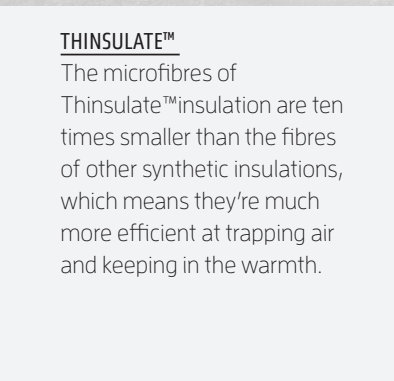

CUSTOM FIT

This new unique system gives the opportunity to customize the glove/ mitten to the anatomical shape of the hand.

WOOL LINING

Wool is an excellent insulator, resistant and breathable, it is naturally absorbent and does not capture odors. Thanks to these unique characteristics, it is one of the favorite materials for our linings.

THINSULATE™

The microfibrils of Thinsulate™ insulation are ten times smaller than the fibres of other synthetic insulations, which means they're much more efficient at trapping air and keeping in the warmth.

POLYGIENE®

With Polygiene® Stays Fresh Technology, enjoy fresh-all-day confidence. Polygiene makes your glove/mitten stay fresh!

IMPACT PROTECTION

Knuckles and underside of cuff are comprised with a specific anti-shocking material for improved protection and are reinforced with abrasion resistant fabric for top durability.

PULLER

A wider puller inserted in underside of cuff helps to properly wear the glove/mitten

GRAPHENE LINING

Graphene offers perfect thermoregulation as it distributes the heat evenly. It is antibacterial and very breathable.

SUPERFABRIC TIP

Superfabric tipped mitten designed for lasting performance, the mitten's tip features Superfabric, renowned for its exceptional durability in extreme conditions and daily use.

SUPERFABRIC®

SuperFabric® is a material that's longer lasting, has higher durability, and is designed for everything from extreme applications to rugged daily usage.

SPECIFIC PALM CUT

The improved palm-shape facilitates gripping ski poles and offers better sensibility

KIRAX STIMULATOR SYSTEM

This innovative technology stimulates the body's neurological system in a unique way to enhance reaction time, performance, and a sense of general well-being.

DYNEEMA STITCHING

Dyneema Stitching elevates LEVEL ski racing gloves. Our outside stitching delivers an impeccable fit, ensuring superior grip and absolute dexterity. Experience precision and control with every run.

WATERPROOF GOAT LEATHER

A soft waterproof leather, used mainly for ski gloves in areas which are exposed to high abrasion such as the palms or between the thumb and index finger.

SUBLIMATION PRINTING

High-resolution prints on both backs for a trendy-inspired glove/mitt.
