MEMBRA-THERM PLUS

A highly breathable membrane insert that creates a waterproof barrier between exterior layer of the glove and the insulating materials. It optimizes warmth and comfort by keeping the hands dry.

GOOSE DOWN

High-fill power goose down represents the highest quality down commercially available. The down is isolated in small chambers so there is no fill migration; this ensures goose down even distribution and a great insulation performance.

REINFORCED LEATHER PALM

Abrasion-resistant goat leather patches on palm and thumb finger for both stretch and durability.

PREFORMED FINGERS

This is a special anatomical construction that permits a preformed shape. The preformed shape reduces wrinkles on the palm and guarantees better fit and sensitivity.
